# Garden Planner Application Instructions

Key Features

1) Dashboard

This is the first page you'll see when you log in to your account.

Here, you can see the daily weather, including the likelihood of rain, as well as the tasks for the day. Click the 'Manage Tasks' button to be taken to the 'Task List' page, where you can see your full list of tasks.

2) Garden Planner

The garden planner is where you will add the locations where you intend to grow crops in your garden, such as 'Greenhouse' in the screenshot below.

From here, you can view more information about each crop, delete a crop, and delete a garden location which will remove the entire location and its crops from the page. Click the 'Add Crop' button to be taken to the 'Crop Index' page, where you'll find the entire list of crops that you can add.

3) Task List

The task list page is where you will add gardening tasks by specifying their title and date then clicking on the 'Add Task' button.

The list will show you overdue and upcoming tasks in chronological order. You can edit or delete each task or mark it as completed.
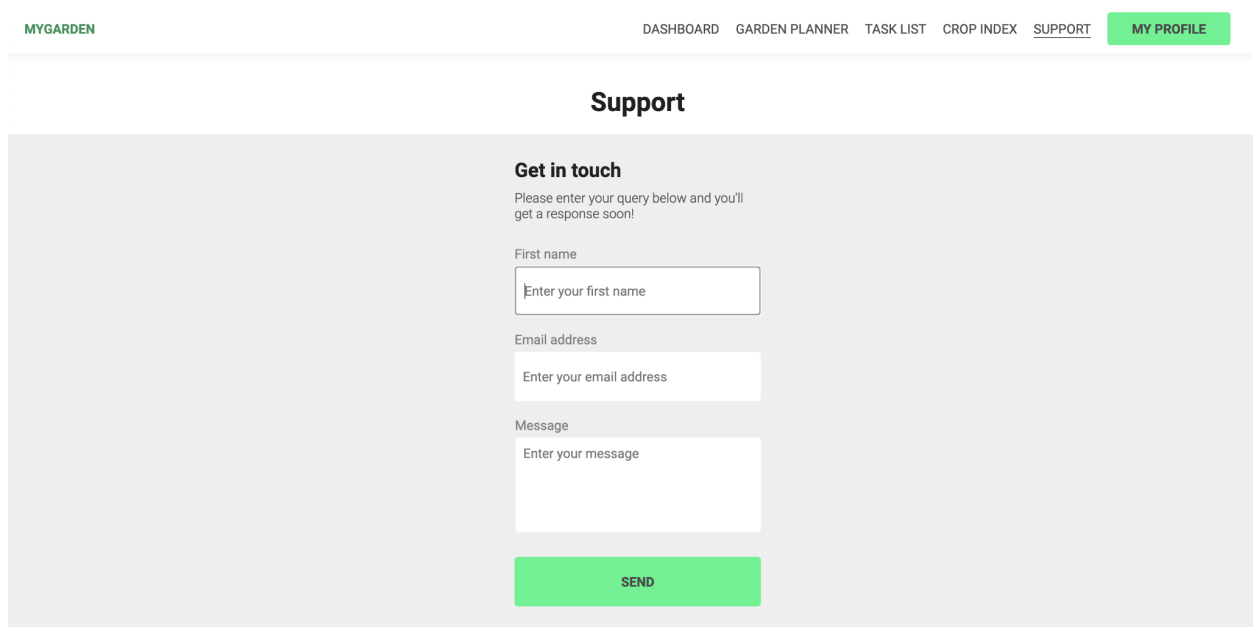

4) Crop Index

The crop index page is where you'll find the full list of crops to add to your garden planner.

For each crop, you can view the information page or click the 'Add to Planner' button to display a pop up that will allow you to select the garden location you'd like to add it to. You can also search for a crop by starting to type it in the search box. If the crop doesn't appear, you can search the alphabetical list, or it may not be there, in which case you can submit a support request if you'd like to add it. (See the support information below on how to do so.)

5) Support

The support page is where you'll find a contact form that you can fill out to get in touch with any queries you may have.

This is also the page where you'll find these instructions, so you'll probably be familiar with this page already! If you have any questions about these instructions or anything else, please use the contact form and you'll get a response as soon as possible.
